

Shaker according CEN 212

Since **February 2001** all firework, which will sold in Switzerland has to be previous tested. For authorise, shacked firework (according to CEN 212) has to hand over the admission bureau of Switzerland.

TEA AG is accepted to perform the shaking tests of firework with official approval of the **Federal Office for Police Switzerland – Central Office for Explosives and Pyrotechnics -**.

To pass the vibration part of the qualification test a special shaker is needed. **TEA AG** build such special shaker. **TEA AG** offer you the suitable shaker or will provide the testing service for you.

The **Federal Institute for Materialtesting and –research Germany (BAM)** is using our shaker for its qualification tests of firework.

Our offer:

- ✓ The vibration-profile agrees with the norm (CEN 212) predicted data.
- ✓ Easy usage.
- ✓ Compact and robust design.
- ✓ A special table for the qualification of special rockets admitted in Switzerland is available.
- ✓ A software to control and supervise the vibrator including data record is available.
